Our automated, AI-powered language assessments strengthen communication and help you provide more value to customers.

**Ensure language proficiency across multiple disciplines.**

**Spoken (SVAR)**
AI-driven machine learning evaluates pronunciation, fluency, active listening, listening comprehension, vocabulary and grammar automatically and instantaneously. Includes CEFR level score (Common European Framework of Reference for Languages).

**Written (Writex)**
Uses natural language processing (NLP) and AI which closely mimics human evaluators to grade written English text in email or essay form. It provides objective scores, including CEFR and feedback on the content quality and structure, grammar, mechanics and typographical errors.

**Reading Comprehension**
Adaptive, multiple-choice test measuring grammar, functional vocabulary and reading comprehension

---

**Our results for a global technology client.**

- **Faster Hiring Decisions**
  - 60% reduction in time to hire

- **Higher Quality, Less Cost**
  - 1400 hours of recruiting hours saved

- **More Candidates Assessed**
  - 8,000 candidates assessed in just one month

---

**Leading the way in talent innovation.**
Build a multilingual workforce and help your business thrive with SHL’s language assessment and talent acquisition solutions.
